

Connecting Steps

March '21

BETA Trial of Connecting Steps V5 with selected schools

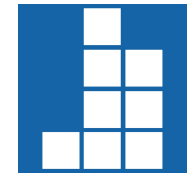

May '21

Release of Assessment screens and Level Summary screens to all current users

Summer '21

Individual Reports, Group Reports and Printing will be added to Connecting Steps V5

January '22

New Analytics platform to replace CSAM will be available to all schools.

Connecting Steps V4 and V5 access the same content and show the same data. Moving to V5 will not impact your data. All frameworks are available in V5. Some older frameworks may have limited features in V5.

You will be able to print and create graphs in V4 until those features are added to V5. Our new analytics platform will replace CSAM in 2022.

As functionality is added to V5, the functionality in V4 will be reduced. Connecting Steps V4 will be retired in 2022.
